

Fedor Savinov

Research Internship – Deep Learning & Computational Biology

Paris, France · fedor.savinov@etu.sorbonne-universite.com · +33 7 83 21 02 38 · fedor.savinov.com · github.com/Fedia222

Profile

Applied Mathematics and Data Science Master's student at Sorbonne University, with strong foundations in statistics, machine learning, optimisation and scientific programming. Completed two Kaggle Learn courses in deep learning and currently studying structural biology and generative protein design. Available for a six-month research internship from January 2027 during a gap year between M1 and M2.

Education

Sorbonne University – Faculty of Science and Engineering 2025 – Present

Master's Degree in Applied Mathematics – Statistics, Computing and Data Science *M1 completed; gap year before M2*

Relevant coursework: Computational Statistics and Machine Learning, High-Dimensional Statistics, Data Analysis, Advanced Probability, Functional Analysis and C++ Programming.

Sorbonne University – Faculty of Science and Engineering 2022 – 2025

Double Bachelor's Degree in Mathematics and Physics

Kaggle Learn – Deep Learning Curriculum 2026

Completed *Intro to Deep Learning* and *Computer Vision*: neural networks, TensorFlow/Keras, convolutional networks, regularisation, transfer learning, data augmentation and model validation.

Research & Professional Experience

Co-founder – Data & AI Engineer May 2025 – Present

Wots AI – Data and artificial intelligence consulting

- Design and prototyping of Python-based data and AI pipelines, from data preparation and experimentation to model evaluation.
- Definition of technical architectures, validation protocols, performance metrics and data governance principles.
- Coordination of technical work and communication of methodologies and results to technical and non-technical stakeholders.

Freelance Data Analyst May 2025 – Sept. 2025

Independent

- Exploratory data analysis, preprocessing and feature engineering for predictive modelling tasks in Python.
- Development and comparison of classification and regression models using cross-validation and performance analysis.

Research Intern Summer 2023

Paris Observatory – Meudon

- Developed N-body simulations in Python and compared simulation outputs with observational scientific data.
- Worked autonomously in an academic research environment and documented the methodology and results.

Project Manager Sept. 2022 – Nov. 2024

AntexCloud

- Coordinated a team of 6–10 people, structured project workflows and monitored operational data and performance indicators.

Technical Skills

Programming & Data: Python, NumPy, Pandas, Scikit-learn, XGBoost, TensorFlow/Keras, C++, Git, SQL(basic)

Deep Learning: Neural networks, convolutional neural networks, transfer learning, regularisation, data augmentation, model training and validation

Machine Learning: Classification, regression, feature engineering, cross-validation and model evaluation

Quantitative Methods: Statistics, probability, optimisation, linear algebra and numerical methods

Tools:

Jupyter Notebook, Git and GitHub

Selected Projects & Independent Learning

Independent Study – AI for Protein Design Structural biology, AlphaFold, RFdiffusion, ProteinMPNN

Ongoing review of scientific literature and tutorials on protein structure prediction, backbone generation, sequence design, protein–protein interactions and in silico candidate filtering.

Deep Learning Coursework Python, TensorFlow/Keras, Kaggle Learn

Built and evaluated neural-network models; studied convolutional networks, transfer learning, data augmentation, validation strategies and methods for controlling overfitting.

Medical Data Classification Python, Pandas, Scikit-learn, XGBoost

Prepared and explored medical data, trained classification models and compared their performance using cross-validation and appropriate metrics.

Additional Information

Languages: French fluent, English fluent, Russian native

Sports: Competitive Brazilian jiu-jitsu and volleyball

Teamwork: Organisation of large-scale university events
