Applied Mathematics student specializing in Data Science, currently completing a gap year. I develop projects combining data analysis, machine learning, and digital application development. I am particularly interested in building end-to-end data solutions, from data structuring and analysis to delivering actionable insights for business teams.

Education

Sorbonne University – Faculty of Science and Engineering 2025 – 2026
Master 1 in Applied Mathematics – Advanced Data Science Track
Advanced Probability · Computational Statistics and Machine Learning · Advanced High-Dimensional Statistics · Foundations of Data Analysis · Optimization · Functional Analysis · C++

Sorbonne University – Faculty of Science and Engineering 2022 – 2025
Dual Bachelor's Degree in Mathematics & Physics

Professional Experience

Founder · Wots AI May 2025 – Present

- Designed digital solutions combining data processing, automation, and artificial intelligence.
- Developed web prototypes in HTML, CSS, and JavaScript and structured the data flows required by applications.
- Managed projects end-to-end, from business needs analysis and feature definition to development, validation, and KPI monitoring.

Freelance Data Analyst · Independent May 2025 – Sept. 2025

- Cleaned, transformed, and performed exploratory analysis on datasets using Python.
- Developed statistical models, automated analytical workflows, and delivered quantitative recommendations.

Project Manager · AntexCloud Sept. 2022 – Nov. 2024

- Coordinated a team of 6 to 10 people across digital projects.
- Built dashboards, monitored key indicators, and translated business requirements into product features.

Research Intern · Meudon Observatory Summer 2023

- Developed numerical N-body simulations and analyzed observational data.

Technical Skills

Python & Data Python · Pandas · NumPy · Scikit-learn · XGBoost · TensorFlow · Keras · Matplotlib	Development JavaScript · HTML · CSS · C++ · Web interfaces · Prototyping · UX/UI fundamentals
Data Science Machine Learning · Deep Learning · Exploratory Data Analysis · Feature Engineering · Statistical Modeling · Model Validation	Data & Tools SQL · Data Pipelines · Git · GitHub · Jupyter Notebook · VS Code · AI-Assisted Development

Selected Projects

Predictive Analysis of Medical Data
Python · Pandas · NumPy · Scikit-learn · XGBoost

- Analyzed clinical and lifestyle factors associated with the risk of preterm birth.
- Performed preprocessing, feature engineering, classification, and model comparison using cross-validation.

Financial Time Series Forecasting
Python · Pandas · Scikit-learn · Matplotlib · C++

- Developed regression models for financial time series, including feature engineering and performance analysis.

Additional Information

Languages	French — Fluent · English — Fluent · Russian — Native
Student Activities	Organized large-scale university events
Sports	Brazilian Jiu-Jitsu · Volleyball · Chess · Competitive level
