Education

Sorbonne University – Faculty of Science & Engineering

2025 – Present

Master's Degree in Mathematics – Advanced Data Science Track

Coursework: Advanced Probability, Computational Statistics, Machine Learning, High-Dimensional Statistics, Functional Analysis, Data Analysis, C++

Sorbonne University – Faculty of Science & Engineering

2022 – 2025

Dual Bachelor's Degree in Mathematics & Physics

Professional Experience

Founder

May 2023 – Present

EllipseIT – AI Process Automation

- Designed AI-driven workflow automation systems and structured data pipelines.
- Led end-to-end project execution (scoping to deployment).
- Managed client relations and strategic growth.

Freelance Data Analyst

May 2025 – Sep 2025

Independent

- Conducted EDA, built predictive models, and automated reporting using Python and SQL.
- Delivered data-driven insights for operational decision-making.

Project Manager

Sep 2022 – Nov 2024

AntexCloud

- Led a team of 6–10 delivering digital projects within budget and deadlines.
- Implemented monitoring dashboards and structured data workflows.

Research Intern

Summer 2023

Observatoire de Meudon

- Developed N-body simulations and validated predictions against observational datasets.

Technical Skills

Programming: Python (NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, XGBoost), SQL (basic), C++, Git

Machine Learning: Regression, Classification, Time Series Modeling, Model Evaluation

Data Analysis: Exploratory Data Analysis, Statistical Modeling, High-Dimensional Data

Tools: Git, Jupyter Notebook

Selected Projects

Stock Price Forecasting

Python, Pandas, Scikit-learn, Matplotlib, C++

Built regression models on financial time-series data; engineered features and visualized performance.

Medical Data Analysis

Python, Pandas, NumPy, Scikit-learn, XGBoost, Seaborn, Matplotlib

Applied classification models and optimized predictive performance via cross-validation.

N-body Celestial Simulation

Python, NumPy, Matplotlib

Modeled gravitational systems using numerical integration techniques.

Additional Information

Languages: French (Fluent), English (Fluent), Russian (Native)

Sports: Brazilian Jiu-Jitsu (competition), Volleyball

Student Associations: Organized large-scale university events
